I am just there, not linked to `content.md`. I should be put at the end of first section content by alphabetical order. This could be last minute thanks.

Chapter one

Figure 1 – installation: pulse

I am inline referencing to an image ([figure 1](#)) .

Lorem ipsum dolor sit amet, consectetur adipisicing elit. Doloribus, fugit, id. Unde nulla incidunt sapiente reiciendis atque similique totam, facere earum dolores. Soluta earum, autem! Fugit, iure, repellat. Nesciunt, inventore.

Lorem ipsum dolor sit amet, consectetur adipisicing elit. Sequi necessitatibus aliquam nisi odio et perferendis reiciendis porro, fugit repellat similique consequuntur dolor perspiciatis? Laborum doloribus ducimus alias sequi sapiente! Voluptate.

Then I want to say that the image ([figure 1](#)) that I showed is awesome.

Lorem ipsum dolor sit amet, consectetur adipisicing elit. Optio nemo eius autem, saepe dolore nam iste ex inventore, minus neque mollitia molestias facere asperiores vel voluptas beatae esse perspiciatis cupiditate.

Lorem ipsum dolor sit amet, consectetur adipisicing elit. Dolore commodi maxime laborum cupiditate nam consequuntur in. Laudantium autem, accusantium! Iure, autem quas quis, odit fugit dolor voluptatum esse quisquam asperiores.

And then I want to display a group of images :

Figure 2 – A group of images

And then I want to point to an online¹ resource.

1. <https://medium.com/@sxywu/on-d3-react-and-a-little-bit-of-flux-88a226f328f3#.4z6m379fa>

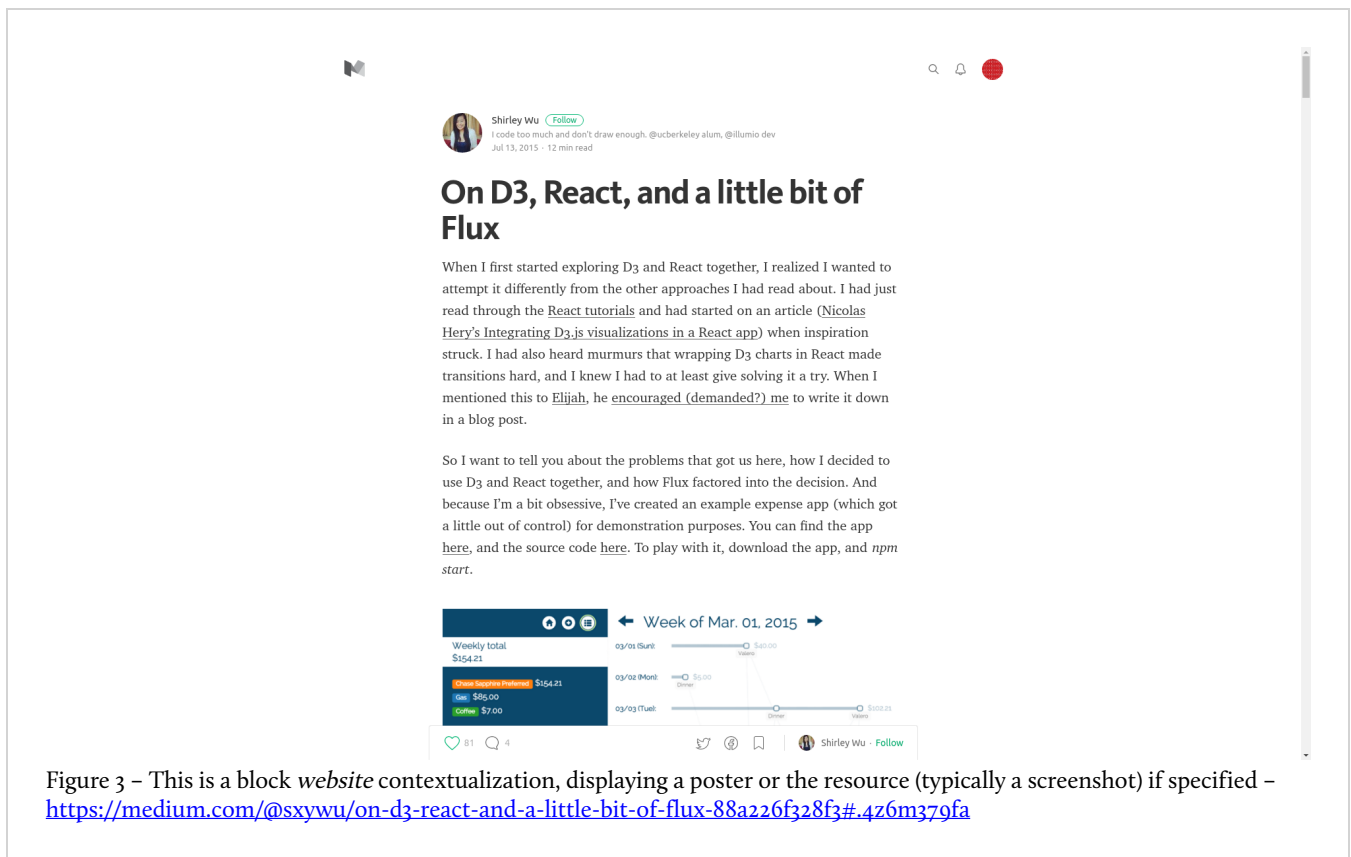

Figure 3 – This is a block *website* contextualization, displaying a poster or the resource (typically a screenshot) if specified – <https://medium.com/@sxywu/on-d3-react-and-a-little-bit-of-flux-88a226f328f3#.4z6m379fa>

I will talk about that² :

Another reference with unnamed contextualizer

I will first quote in a book where someone that says “it’s not possible” (CHARALAMBOS et BORDER, 1994). But I would like to quote again my group of images (figure 2) .

Then I should have an ibid here³

And as say a lot of people⁴, publishing could be simpler.

I’m now going to quote a book from the same authors in the same year, but different - it should add a b but let’s see what’s in the footnote⁵.

And for the footnotes, I want to say that Martin said that⁶

Whe Martin says “there has to be some *change*” (*ibid.*).

Now let’s say I want to link to this timeline and continue my paragraph quietly.

Welcome to my awesome book.

Lorem ipsum dolor sit amet, consectetur adipisicing elit. Dolor, saepe. Facere minus dolores, voluptatem quia provident dolor odit neque nihil, est commodi, suscipit eligendi, mollitia. Ratione voluptates, alias! Consequuntur, earum.

An inline resource video, it should display a thumbnail or something in static mode even if its not visible :

I am now talking about [material things](#). But I would prefer to register it as [a concept](#), for instance “materiality of things”. Check out the glossary !.

2. with a footnote here

3. *ibid.*, p. 12.

4. MARTIN et COLEMAN, 2002a, pp. 30-40

5. MARTIN et COLEMAN, 2002b, pp. 32-36

6. MARTIN et COLEMAN, *op.cit.*, pp. 12-13 when he says : “hello”

I try a third footnote¹²

I am going to talk in the end about [Anthony Grafton](#). But I would like to see his name written without writing his name twice : [Anthony Grafton](#).

And how couldn't I link Grafton to the concept of [Materiality](#) ?

Materiality

p. [6](#), p. [7](#), p. [9](#)

materiality of things : p. [6](#)

Materiality of computers : p. [8](#)

When we read literature and look at images on pages or screens, we are usually trying to extract information from words, symbols and figures. We don't often think about the physical processes involved in this or even the material objects with which we are interacting: we seem to see through the paper pages and the illuminated computer screens, barely registering differences between media as we work out the messages being transmitted through them. Yet the material properties of different media have all sorts of subtle effects on our reading and viewing experiences. For example, the way that the cover of a book feels or looks can determine whether we pick it up and enjoy reading it, and the brightness and speed of electronic images can determine whether we stay on one site or click our way to another.

A good book about data

Jim Incredible

Alice is sitting with her sister outdoors when she spies a White Rabbit with a pocket watch. Fascinated by the sight, she follows the rabbit down the hole. She falls for a long time, and finds herself in a long hallway full of doors. There is also a key on the table, which unlocks a tiny door; through this door, she spies a beautiful garden. She longs to get there, but the door is too small. Soon, she finds a drink with a note that asks her to drink it. There is later a cake with a note that tells her to eat; Alice uses both, but she cannot seem to get a handle on things, and is always either too large to get through the door or too small to reach the key.
